

Setting up the guidelines and expectations

08 June 2025 20:33

Pre-requisites

- ① Mathematics
 - Linear Algebra
 - Calculus - Differentiation, Maxima & Minima
 - Probability distribution & Random Variables
 - Statistics
 - Descriptive
 - Inferential
- ② Bias and Variance Trade-off | Partially done for the cohort
- ③ Gradient Descent Algo (APC to teach)
- ④ Decision Trees, Random Forest etc.
- ⑤ UDF: User-Defined Functions to mimic any algorithms.
 - Using UDF
 - oops
 - List
 - Dictionary
 - Arrays
 - zip()
 - apply()
 - visualization skills
 - matplotlib
 - seaborn
 - plotly ✓

Quick Revision.

[OOPs + Numpy + Pandas + Visualization]

Certain Guidelines:

① Gentle Reminder: Respect time and money.

a) DO NOT MISS A SINGLE LIVE SESSION.

② Dedicated Doubt slots (DDS) $\left\{ \begin{array}{l} \rightarrow \text{after the break (10-15mins)} \\ \rightarrow \text{in the end of session.} \end{array} \right.$

③ Industry based Training

- real world examples / use-cases
- share materials / resources which will enrich learning
